

WHO WE SERVE

Weston County Public Health serves each and every resident in need of healthcare support. We are committed to being your partner in health through every stage of life. Our services are available for new parents and infants, teenagers, older adults, anyone with or without insurance, residents not currently seeing a primary physician, and everyone in between.

NEW PARENTS

At Weston County Public Health, we understand that parenthood can be exciting, overwhelming, exhausting, and beautiful all at the same time. Our services are designed to help new parents navigate caring for their newborn while supporting their own health. From breastfeeding support to home nurse visits, our dedicated team is by your side in this season of life as a new parent. With our passionate care and support, you can feel confident and empowered as you embark on your parenthood journey.

OLDER ADULTS

We believe the residents of Weston County should thrive at any age. Our team serves the older adults of our communities ensuring they have support and access to healthcare services that meet their unique needs. We develop and deliver resources and assistance in managing chronic conditions like diabetes, mitigating fall risk, staying active and independent, connecting with others in your community, or whatever support you need to live happy and healthy.

TEENAGERS

Weston County Public Health is a shoulder to lean on for the teenagers in Weston County when it comes to their health, wellbeing, and safety. Teenage years are filled with ups and downs and our supportive staff helps make the ride a little smoother. We offer access and assistance in contraception, sexual health, mental wellbeing, relationships, substance use prevention, and more. We're committed to being your one stop shop for any and all questions and concerns about your health and wellbeing.

COMMUNITY VACCINATIONS

Since the COVID-19 pandemic, we live in a very different world than before. Yet, vaccinations and immunizations have always been a staple to a healthy, thriving community. At Weston County Public Health, we provide convenient and accessible vaccinations, beyond COVID-19, for all residents. By prioritizing knowledge, respect, and equitable access, we can empower our community to stay protected and prosperous.
